

SALS3 MASTER ARCHITECTURE & LAUNCH PLAN

Master Architecture & 3 to 5-Month Transition Blueprint

Month 1 Shopify Cash Flow + Custom B2C Website & Seller Center Build

Lead Architects & Operators: AJ & Bogs (The Sals3 Engineering & Operations Team)

The 3 Core Pillars of Sals3

Pillar 1: Shopify Pop-Up Store (Month 1)

Active for 30 days. Generates immediate sales & cash flow while we build our custom platform in the background.

Pillar 2: Customer Website (Months 2-3)

WHERE BUYERS SHOP!
Shopee/Lazada-style website (sals3.com) where shoppers browse, add to cart, pay & track parcels.

Pillar 3: Sals3 Seller Center (Months 3-4)

WHERE SELLERS WORK!
Shopee/Lazada-style seller portal where vendors upload SKUs, process orders, print waybills & get paid.

Detailed 10-Step Item Lifecycle (Connected Flowchart)

Curated High-Quality Catalog Gate & Media Queue

Automated Quality Gate Rules

Products fetched from CJ Dropshipping must pass strict algorithmic filters before entering the publishing queue:

- 4.5+ Star Rating Guard: Keeps out low-rated items.
- >100+ Sales Volume Guard: Accepts only proven best-sellers.
- Verified Supplier Guard: Accepts items from Gold suppliers only.

Media Review Queue & Photo Touchups

Approved items enter the Sals3 Media Queue for photo cleanup and text formatting.

NOTE: Photo cleanup, watermark removal, and custom graphic touchups will be handled as an **ADDITIONAL FEATURE / SEPARATE WORKFLOW** by a dedicated Content/Media Specialist (to be discussed separately).

Sals3 Customer Shopping Website UI (Where Buyers Shop)

💡 **DISCLAIMER:** This UI mockup, visual layout, and payment options are sample representations for demonstration only. All detailed functionalities, payment gateways, and business logic will undergo further alignment discussion with Sals3 Leadership.

WHAT HAPPENS ON THIS SCREEN:

- 1. Public Storefront (sals3.com): The main shopping site where customers browse and buy.
- 2. Shopee/Lazada Style UX: Intuitive categories, promo banners, and high-converting product grid.
- 3. Only High-Quality Items: Only products passing our 4.5+ Star & >100 Sales filter appear here.
- 4. Real-Time Stock Lock: Out-of-stock items automatically hide or disable checkout in real time.
- 5. Further Discussion: Final UI layout & category structure subject to owner alignment.

Sals3 Product Page & 1-Click Checkout UI Mockup

WHAT HAPPENS ON THIS SCREEN:

- 1. Product Collateral: Photo gallery, size/color selectors, and verified buyer photo reviews.
- 2. Payment Options (Sample Mockup): Buy button showing sample payment options (GCash/Cards).
- 3. Dynamic Shipping Calculator: Auto-calculates courier delivery fees based on address.
- 4. Auto Receipt: Triggers instant email/SMS confirmation and enters order into database.
- 5. Further Discussion: Payment gateway partners & checkout logic to be aligned with owner.

💡 **DISCLAIMER:** This UI mockup, visual layout, and payment options are sample representations for demonstration only. All detailed functionalities, payment gateways, and business logic will undergo further alignment discussion with Sals3 Leadership.

Main Seller Center Dashboard (Where Sellers Work)

💡 **DISCLAIMER:** This UI mockup, visual layout, and payment options are sample representations for demonstration only. All detailed functionalities, payment gateways, and business logic will undergo further alignment discussion with Sals3 Leadership.

⚙️ WHAT HAPPENS ON THIS SCREEN:

- 1. Seller Command Center: Private portal for our product listers
- 2. Top Action KPI Bar: Real-time counters for To-Process Orders, Processed Shipments, & Returns.
- 3. Business Insights: Live sales analytics (GMV), visitor traffic, conversion %, and net profit.
- 4. Shop Health Audit: Monitors seller shipping SLA compliance and customer chat response rate.
- 5. Further Discussion: Specific analytics widgets & dashboard metrics to be finalized with owner.

Order Management & Auto-Fulfillment UI

 WHAT HAPPENS ON THIS SCREEN:

- 1. Order Lifecycle Tracking: Centralized status tabs (UNPAID -> TO-SHIP -> SHIPPED -> COMPLETED).
- 2. 1-Click Mass Waybill Print: Prints official 'Sold & Fulfilled by Sals3' shipping labels & slips.
- 3. Auto CJ API PO Trigger: Automatically orders item from CJ Dropshipping via API with 1 click.
- 4. Live Tracking Sync: Automatically pushes courier tracking ID to customer portal.
- 5. Further Discussion: Order status rules & cancellation policies to be aligned with owner.

💡 **DISCLAIMER:** This UI mockup, visual layout, and payment options are sample representations for demonstration only. All detailed functionalities, payment gateways, and business logic will undergo further alignment discussion with Sals3 Leadership.

Product Management & Bulk SKU Upload UI

 WHAT HAPPENS ON THIS SCREEN:

- 1. Catalog Grid View: Manage published products, prices, stock levels, and quality badges.
- 2. Bulk SKU Excel Import: Direct upload workbook for local brand sellers holding warehouse stock.
- 3. Multi-Variation Matrix: Easily configure size, color, weight, and price per variation.
- 4. Quality Gate Status: Displays 4.5+ star rating score and flags low-performing items.
- 5. Further Discussion: Product categories & bulk import template logic to be aligned with owner.

 **DISCLAIMER:** This UI mockup, visual layout, and payment options are sample representations for demonstration only. All detailed functionalities, payment gateways, and business logic will undergo further alignment discussion with Sals3 Leadership.

Executive Summary & Cutover Strategy

Month 1: Shopify Launch

Launch temporary Shopify Storefront for 30 days to generate immediate cash flow and test CJ demand. Database schema & Quality Gate built in parallel.

Months 2–3: Custom Build

Develop custom B2C Customer Website (Shopee/Lazada style) and Enterprise Sals3 Seller Center in parallel.

Month 3-5: Zero-Downtime Cutover

Perform QA load testing, migrate Shopify customer & SKU CSV records, and execute zero-downtime DNS cutover to sals3.com.
